## Take Your Communications to the Cloud

Is It Time to Move Your Business Communications to the Cloud?

One of the newest and fastest-growing telecommunications trends is called "Hosted" or "Hosted VoIP." From a technology standpoint, it is about moving your business communications to the Cloud. However, it is also a change in how you pay for your office phone system and unified communication solution. As opposed to making a capital investment for the ownership, the hosted approach allows you to pay for this service every month. So, it's both new technology and a new approach to expense management.

Enterprise Capabilities

Enterprise-grade communication tools
Easily Scalable

Add phones and services as your business expands, over 10,000 users

Cost Saving

No large upfront investment required

Reliable

Multiple redundant data centers supervised and maintained 24/7/365

Business Continuity

System continues operating even if your office is out of power or your internet connection is down

Stay Connected to Your Business from Wherever You Are

In the Hosted world, your communications system resides in "the Cloud," on a server in a remote data center, and you access it with an Internet connection. Servers installed in our state-of-the-art data centers are fully redundant with failover protection and are supervised around the clock.

With Zultys Cloud Services, you can be up and running very quickly. Ongoing administration is simple with the MX Admin interface that enables user management, monitoring, and making changes to your service at any time.

Zultys provides and manages the backbone network

Communications travels through the Internet

You can work anywhere and everywhere with the device of your choice

Not All Hosted Solutions Are Created Equal

When selecting a business phone system, one size doesn't fit all. It's about designing the right fit so you can focus on running your business, not worrying about your phone system.

The right fit is the one that gives you the tools to increase productivity and efficiency and help you grow your business profitably while improving client support. Many cloud phone systems out there were designed for the small-office/home-office market and lack true business functionality.

Zultys hosted solutions are built upon over a decade of delivering powerful enterprise-class communications capabilities to small, medium, and large organizations throughout the world.

Whether you have 10 employees or 10,000, have a single location or 100 branch offices, we have the system and the experience to help you communicate better.

Desktop Unified Communication

UC client for Windows & Mac
Mobile App

UC client for iPhone & Android
